

# Using Yield Monitor Data

A workshop sponsored by  
K-State Research and Extension,  
The Kansas Agricultural Research Association,  
and Pankratz Implement

Yield monitors have been commercially available for more than 10 years and many crop producers have multiple years of data. However, the nagging question for many people is, "What can I do with this data?" How many years of data do you need? What about crop rotations? If you have collected yield monitor data for the past few years or want to buy a yield monitor, this workshop is for you. Come and learn the answers to these and other questions. The Kansas Agricultural Research Association is committed to providing its membership with educational programs and the opportunity to interact with experts to further its mission of promoting on-farm research.

## Workshop Agenda:

- 9:00 Welcome and Introductions
- 9:10 Basic Interpretation of Yield Maps – Randy Taylor, K-State
- 10:00 Using Yield Data to Estimate Nutrient Removal – Scott Staggenborg, K-State
- 11:00 Combining Multiple Years of Yield Data to Determine Yield Potential– Randy Taylor, K-State
- 12:00 Lunch
- 1:00 Yield Monitor Data from a Users Perspective – Rick Schlender, Mid Kansas Coop, Moundridge, KS
- 1:50 Closing Comments

To register, call:

Bruce, Linda, or Miranda at 620-662-8681 or 800-665-4620

Hutchinson, Kansas  
March 7, 2005  
9:00 AM to 2:00 PM
